Fleet Assistant Now Integrates with Cancom Tracking System

Cetaris is pleased to announce a new working relationship with Cancom Tracking in which mileage and Driver Vehicle Condition Report data from the QTRACS and SensorTRACS systems will automatically be transmitted to our fleet customers' Fleet Assistant maintenance system. This functionality greatly improves a fleet's ability to accurately track when repairs, warranty and preventive maintenance occur, as well as providing a direct method for capturing DVCRs for scheduling.

About Fleet Assistant

Fleet Assistant was developed by Cetaris in conjunction with a major vehicle OEM, benefiting from more than 30 years of combined fleet maintenance experience. Fleet Assistant is a best-of-breed solution for helping manage the performance of vehicle fleets. Fleet Assistant helps reduce unnecessary warranty and external repair losses and increases savings through easily scheduled preventive maintenance. With a proven ROI, Fleet Assistant is the most important change you can make to your fleet operations. Fleet Assistant revolutionizes the way you use information and make decisions. It marks a shift from simply tracking your equipment data and expenses to making proactive, fact-based decisions by achieving true diagnosis of your fleet data.

Fleet Assistant is a centralized client/server application built on a relational database platform, and supports the requirements of mid-to-large vehicle fleets in a networked environment. Designed to run on Windows client machines, the back-end database is flexible and can be deployed on a variety of platforms to suite the specific environmental requirements of the customer. Fleet Assistant's component architecture allows Cetaris developers to fine-tune a solution for clients' unique requirements, so clients can realize a rapid return on investment. With advanced functionality in its Equipment, Repair Order, Parts, Warranty, Reports and Utilities Modules, plus optional mobile wireless implementation, Fleet Assistant is an ideal software solution to track, analyze, and present critical maintenance information for your fleet. In addition, each module has a comprehensive context sensitive on-line help system that provides users with answers to specific questions, and assists in the pursuit of self-paced individual learning.

About Cetaris

Cetaris Software Inc. as a premier provider of enterprise asset management solutions helping organizations around the world reduce the cost and complexity associated with managing their fleet related assets. Their solution Fleet Assistant was built by fleet people for fleet people, whose evolution began on the shop floor with an understanding and emphasis on the needs of fleet owners, managers, service technicians and administrative personnel.
