### Cetaris Provides Expert VMRS 2000 Support

Cetaris Inc. is pleased to announce VMRS 2000 support available to all Cetaris fleet customers when implementing the Fleet Assistant® maintenance software solution. VMRS (vehicle maintenance reporting standards) allows fleets to improve the consistency and quality of their maintenance data, and provides a foundation for fleets to conduct internal trend analysis and benchmark their maintenance operation with other fleets utilizing VMRS. VMRS establishes a universal reporting convention for industries that utilize all types of cars, trucks, and other equipment as well as standardizes the data records and reports related to the activities associated with their unique maintenance operation.

Doug Andrew is an industry unique VMRS support person at Cetaris. Doug is a former Vice President of Maintenance for TNT. He was an original member of the Maintenance Committee of the Regular Common Carrier Conference (RCCC) that created VMRS. Doug has supported many Fleet Assistant® software implementations, working closely with fleets to refine their approach to properly implementing the VMRS codes. Cetaris has incorporated this VMRS experience and depth of knowledge into the standard Fleet Assistant® implementation process which allows all Cetaris customers to benefit from the experience gained.

### About Fleet Assistant

Cetaris developed Fleet Assistant in conjunction with a major vehicle OEM, benefiting from more than 30 years of combined fleet maintenance experience. Fleet Assistant is a best-of-breed solution for optimizing the economic and operational performance of vehicle fleets. Fleet Assistant supports lower maintenance cost through effective PM scheduling, improved staff productivity, improved workflow using wireless technology for repair orders and parts physical inventory, reduced paper work, improved warranty tracking and capture, improved chronic repair tracking and capture, increased focus on parts cost, increased parts inventory turns, improved total product life cycle cost reports, and improved management by exception reports. Fleet Assistant marks a shift from simply tracking equipment data and expenses to making proactive, fact-based decisions through the analysis and interpretation of fleet data.

### About Cetaris

Cetaris Software Inc. as a premier provider of enterprise asset management solutions helping organizations around the world reduce the cost and complexity associated with managing their fleet related assets. Their solution Fleet Assistant was built by fleet people for fleet people, whose evolution began on the shop floor with an understanding and emphasis on the needs of fleet owners, managers, service technicians and administrative personnel. Their solution continues to evolve addressing all the key requirements a business demands to optimize the performance and productivity of its fleet related assets. Consequently, today some of the world's largest; most sophisticated and efficient organizations depend on the Web Fleet Assistant to manage millions of their assets in more than 50 countries worldwide.

Headquartered in Toronto, Cetaris is more than just a software provider, combining exceptional human capital, with best of breed business processes and world class software tools to deliver a robust, turnkey solution.
