Calfrac Well Services Ltd. to Implement Cetaris Web Fleet Assistant

Cetaris is pleased to announce that Calfrac Well Services Ltd. of Calgary Alberta, a leading provider of specialized oilfield services, including fracturing, coiled tubing, cementing and other well stimulation services, has successfully completed the Cetaris Web Fleet Assistant Requirements Phase. The Requirements Phase included Calfrac personnel from Maintenance, Logistics, Operations, IT Systems, and Accounting. Calfrac has now started the Implementation Phase for the Web Fleet Assistant system. Designed for use by technicians, parts people, and maintenance leadership, the Web Fleet Assistant system supports Calfrac's continuous improvement of the maintenance efficiency of their fleet of well servicing equipment across regions in Canada, the United States, and Russia.

"Our team researched several systems and found that Cetaris met or exceeded all our company's requirements. It is simple to use, will handle our continued company growth, has the ability to multi-language and will handle multiple currencies. A key factor in our decision was the need for integration with our current accounting systems and Cetaris has a proven track record with their SIM modules. We are very excited to be moving forward with the project and expect to see ROI in a very short time. This system will be able to track our equipment and parts warranties, manage our repair orders and provide us with detailed maintenance reporting. The requirements stage helped Cetaris to better understand our current business processes and this was a critical part of our implementation. We expect this to help us improve our business, not change it." said Shane Miller, Calfrac's Maintenance Manager.

"Calfrac and Cetaris followed a disciplined requirements phase over a period of four months to confirm the work flow, identify the key points of integration required, and to develop the detailed implementation and rollout plan," said Ric Bedard, President and Founder of Cetaris. "This detailed planning allowed the Calfrac and Cetaris teams to develop and document a thorough understanding of Calfrac's system, data, integration, and rollout requirements reducing project risk and increasing implementation quality".

About Calfrac Well Services Ltd. Calfrac Well Services Ltd. of Calgary Alberta provides specialized oilfield services to exploration and production companies designed to increase the production of hydrocarbons from wells drilled throughout western Canada, the Rocky Mountain region and Central region of the United States and western Siberia in Russia. The specialized oilfield services include fracturing, coiled tubing, cementing and other well stimulation services. Our Customer-First focus is not just something to hang on the walls of our corporate headquarters. It's a belief that informs everything we do, from building practical solutions around what our customers truly need to the rigorous field testing of our equipment. The result is an ongoing investment in research and development, from our satellite fracing service to our integrated Calfrac Management System, to name a few. From our technical services team to our field operators, our people bring the expertise, knowledge and innovative ideas that enable us to deliver on our promise of technologies that work in the field.

About Cetaris

Cetaris Software Inc. as a premier provider of enterprise asset management solutions helping organizations around the world reduce the cost and complexity associated with managing their fleet related assets. Their solution Fleet Assistant was built by fleet people for fleet people, whose evolution began on the shop floor with an understanding and emphasis on the needs of fleet owners, managers, service technicians and administrative personnel. Their solution continues to evolve addressing all the key requirements a business demands to optimize the performance and productivity of its fleet related assets. Consequently, today some of the world's largest; most sophisticated and efficient organizations depend on the Web Fleet Assistant to manage millions of their assets in more than 50 countries worldwide.

Headquartered in Toronto, Cetaris is more than just a software provider, combining exceptional human capital, with best of breed business processes and world class software tools to deliver a robust, turnkey solution.
