Cetaris 2008 Core User Conference

Cetaris is pleased to announce that U.S. Xpress hosted the 2008 Cetaris Core User Conference at their corporate head office in Chattanooga, Tennessee from Sunday February 24th through Tuesday February 26th, 2008. This was the fourth Core User Conference, establishing a tradition of regularly bringing Fleet Assistant core users together to dialogue about best practices in the implementation and daily use of their mission critical asset management software, and to contribute to the direction of Cetaris' asset management software product development.

Co-hosting with U.S. Xpress marks the first year Cetaris held this event at a user site which afforded participants with a first-hand look at a wide-scale implementation and an eye into how industry peers are using Cetaris' Fleet Assistant product in a shop operation. Cetaris commends U.S. Xpress for having provided a stimulating setting for the conference and extending this knowledge sharing experience to the network of Fleet Assistant core users.

Cetaris' goal with this year's conference was to explore the theme of 'Continuous Improvement' in fleet maintenance operations as well as to continue efforts to align Fleet Assistant development with core users' business objectives. The key note speaker, a leading Mechanical & Industrial Engineering University Professor addressed real-time monitoring; data collection, pre-processing, analysis, and modeling; and using this modeling for early fault detection and failure prevention. Guest speakers from core user organizations were featured covering key performance indicators, reliability based maintenance practices, and implementation best practices. Small breakout group work sessions were held on Fleet Assistant product development direction.

About Cetaris

Cetaris Software Inc. as a premier provider of enterprise asset management solutions helping organizations around the world reduce the cost and complexity associated with managing their fleet related assets. Their solution Fleet Assistant was built by fleet people for fleet people, whose evolution began on the shop floor with an understanding and emphasis on the needs of fleet owners, managers, service technicians and administrative personnel. Their solution continues to evolve addressing all the key requirements a business demands to optimize the performance and productivity of its fleet related assets. Consequently, today some of the world's largest; most sophisticated and efficient organizations depend on the Web Fleet Assistant to manage millions of their assets in more than 50 countries worldwide.

Headquartered in Toronto, Cetaris is more than just a software provider, combining exceptional human capital, with best of breed business processes and world class software tools to deliver a robust, turnkey solution.
